Introduction (Times New Roman, Font 12 pt)

Contains the scope, background of the objectives and benefits of the study. This section should provide background so that the reader can understand and assess the results of the study without reading previous reports relating to the topic. Give literature that can support the discussion.

Materials and Methods (Times New Roman, Font 12 pt)

Describe in detail and clearly the design of the study, the method of treatment, the materials used and the method of work carried out, including statistical methods and an explanation of the certificate of ethical conduct of the animal if needed. The method of work submitted should contain sufficient information so as to enable the research to be repeated successfully.

Results and Discussions (Times New Roman, Font 12 pt)

Presented jointly and discussed clearly the results of the study. The results of the research can be presented in written form in a script, table or picture. Reduce the use of graphics if it can be explained in the text. Limit the use of photos, present photos that clearly describe the results obtained. Pictures and tables must be numbered and quoted in the text. Photos can be sent in JPG, JPEG and PNG formats. The result of processing data is sent in a file separate from the scientific script file and accompanied by the name of the program and basic data for compiling the graph. The discussion presented should contain an interpretation of the results obtained and the discussion relating to previous reports. Avoid repeating statements that have been conveyed to methods, results and other information that has been presented in the introduction.

Conclusion (Times New Roman, Font 12 pt)

Must be specific, clear and answer the problem. Presented separately from the results and discussion.
